

**NEW STUDY ASSESSMENT BY RANCHO ADMINISTRATION**

*This completed form is to be reviewed by designated Rancho administration for adherence in keeping with Rancho's mission and in compliance with current DHS guidelines prior to submitting to the IRB for review.*

**Principal Investigator:** \_\_\_\_\_

**Co-Investigator(s):** \_\_\_\_\_

**Study Title:** \_\_\_\_\_

**Funding Source:** *(please check one)*

- Industry** *(provide name of sponsor):* \_\_\_\_\_
- Federal** *(provide name of agency):* \_\_\_\_\_ **If Federal, is this a sub-award?**  Yes  No
- None**                       **Pending/Other** *(provide detail):* \_\_\_\_\_

**Study Abstract**

Purpose:

\_\_\_\_\_

\_\_\_\_\_

Study population: \_\_\_\_\_

Study Methods/Procedures: \_\_\_\_\_

\_\_\_\_\_

Known Risks: \_\_\_\_\_

**Potential Risk(s) Assessment by RRI:**     **Minimal**     **Greater than minimal**

**RRI Approval:** \_\_\_\_\_

**Date:** \_\_\_\_\_

*To be completed by Rancho administrative designee:*

**Meets DHS Research Priorities:**  **Yes**  **No**

Check applicable research project categorization and DHS resource support\*

- (1) The research performed at DHS sites is well aligned with DHS strategic priorities and is expected to have significant direct impact on DHS clinical operations. DHS may fully support the project with direct resources, though investigators are encouraged to seek extramural funding.
- (2) The research performed at DHS sites is aligned with DHS strategic priorities and is expected to benefit the DHS patient population. DHS may provide partial support, but external funding is required to meet the full research objectives.
- (3) The research may be conducted at DHS sites and has potential future benefit for DHS patients. DHS will allow access to required resources; however, the study must fully cover all associated variable costs.
- (4) The research supports the development of new drugs, devices, or procedures with potential future benefit but does not directly address current DHS service priorities or disproportionate patient needs. DHS resource use is permitted, but all associated variable costs must be fully compensated by the study.
- (5) The research provides no benefit to DHS or its partners and therefore should not be conducted on a DHS campus or use DHS resources.

*\*Resources refer to services or supplies; staff time and effort; access to patients*

**Approved for IRB Review:** \_\_\_\_\_

**Date:** \_\_\_\_\_
